SHERPA PROS · CONFIDENTIAL · FOR INVESTOR REVIEW ONLY

$1.27T

Total addressable market — labor + materials, US, 2026

$731B labor (residential remodeling + commercial property maintenance)
$540B materials (residential + light-commercial trade materials)

Sources: JCHS LIRA 2026 forecast · Market Research Future · BLS construction materials shipments

SHERPA PROS · CONFIDENTIAL · FOR INVESTOR REVIEW ONLY

The labor TAM — $731B

COMPONENT	2025–2026	SOURCE
US residential remodeling & repair	**$524B**	Harvard JCHS LIRA October 2025
US commercial property maintenance	**$207.5B**	Market Research Future 2025
Total labor TAM	**~$731B/year**	

Cross-check: US home services market $97B (Expert Market Research) — tighter definition, acts as a floor on TAM.

1 basis point capture (0.01%) = $73M GMV. Even fractional share supports a venture-scale outcome.

The materials TAM — $540B (NEW 2026-04-25)

The materials orchestration layer (Sherpa Materials engine + Zinc API + Uber Direct) shipped 2026-04-25.

Why this changes the model: materials were customer-handled before (homeowner walks into Home Depot, contractor runs their own PO). After launch, materials are platform-coordinated.

CAPTURE RATE	THROUGHPUT	COORDINATION FEE REVENUE
0.1% of $540B	$540M	**$43M–$65M/year** at 8–12%
0.5% of $540B	$2.7B	**$216M–$324M/year** at 8–12%

Per-job materials-to-labor ratio = ~60/40. Each $10K labor job has ~$15K materials passing through the platform.

$60B

Phase 1–2 SAM — New England 6-state footprint

$32B labor (NE share of US remodeling + commercial)
$27B materials (NE share of US materials TAM)

Four-metro launch focus: **Portsmouth · Manchester · Portland · Boston ≈ $15.5B**

SHERPA PROS · CONFIDENTIAL · FOR INVESTOR REVIEW ONLY

Four-metro launch footprint

METRO	MSA POP.	RESIDENTIAL	COMMERCIAL	METRO TOTAL
Boston	5.0M	$5.5B	$1.5B	**$7.0B**
Manchester NH	415K	$0.45B	$0.10B	**$0.55B**
Portsmouth/Seacoast NH	250K	$0.35B	$0.08B	**$0.43B**
Portland ME	550K	$0.50B	$0.10B	**$0.60B**
Four-metro labor SAM				**~$8.5B**
+ four-metro materials				**~$7.0B**
Combined SAM				**~$15.5B**

SOM trajectory — sub-1% capture at every phase

PHASE	WINDOW	GMV (ANNUALIZED)	TAKE RATE	NET REVENUE
Phase 1	M3–M6	$200K–$1M	5%	$10K–$50K
Phase 2	M6–M12	$1M–$5M	10%	$100K–$500K
Phase 3	M12–M18	$5M–$25M	12–15%	$600K–$3.25M
Phase 3 exit	M18	**$25M run-rate**	13%	**$3.25M ARR**

Sub-0.1% of SAM at every phase. No "we'll capture 5%" magical thinking.

The take-rate stack — vertical integration multiplier

Single-layer labor marketplaces cap out at **10–15% take rate on labor only.** Sherpa Pros stacks four revenue lines:

REVENUE LINE	TAKE RATE	PER-JOB ($10K LABOR / $15K MATERIALS)
Labor commission (Marketplace)	5–12%	$500–$1,200
Materials coordination fee	8–12%	$1,200–$1,800
Sherpa Home subscription	$20–50/mo	$5–$15/job (when active)
Sherpa Success Manager retainer	$500–$2,500/mo	$10–$50/job (when managed)

Blended take rate: 18–25% per job — roughly double a single-layer labor marketplace.

$300M

Sub-vertical pipeline: Mass Save heat pumps alone

75,000+ heat pumps installed in MA since 2019
~20K annual install run-rate at $15K avg = **$300M GMV/year sub-vertical**
Capturing 1% = $3M GMV from this single program

Plus EV charger installs (~$17.5M GMV) · PM vendor spend (~$4.5–9M GMV at 3 anchors)

Defensibility — why the numbers survive IC pressure

01 **TAM sourced from JCHS LIRA + Market Research Future** — primary industry sources, not analyst extrapolations.

02 **NE SAM bracketed by two independent methods** (Census C30 state spend + national pop. share). Cross-validation reduces single-source risk.

03 **SOM set BELOW 0.1% of SAM** at every phase. Investors should not pressure-test "how do you capture 5%" — we don't need to.

04 **GTM exit gates ARE the SOM numbers.** Convergence between strategy and finance.

05 **Sub-vertical drilldowns are real-money pipelines** (Mass Save $300M/year, EV chargers, PM spend) — not speculative addressable categories.

SHERPA PROS · TAM / SAM / SOM · 2026

$1.27T market.
$60B serviceable.
$25M obtainable by M18.

Sub-1% capture is venture-scale.
