SHERPA PROS · EDITORIAL

Sherpa Pros — Brand Consistency Audit (Waves 1+2)

DATE: 2026-04-22 **AUDITOR:** BRAND GUARDIAN AGENT (CLAUDE) **SCOPE:** 15 CUSTOMER- AND INVESTOR-FACING ARTIFACTS PRODUCED IN WAVES 1 + 2 OF THE GTM BUILD **BRAND BIBLE:** `/USERS/POUM/SHERPA-PROS-PLATFORM/DOCS/SUPERPOWERS/SPECS/2026-04-22-GTM-MARKETING-DESIGN.MD` §3 **OUTPUT MANDATE:** PHYROM CAN REVIEW-AND-APPLY ALL P0+P1 FIXES IN UNDER 90 MINUTES. AUDIT-ONLY — NO SOURCE FILES MODIFIED.

1. Executive Summary

Overall brand-health letter grade: B+ (90% bible-aligned; one Critical surname violation, two factual inconsistencies, several dilution-of-voice and unspelled-jargon misses).

Top 3 systemic patterns to fix:

1. **Surname leakage** — one file (`pm-outbound.md` line 22) uses an unverified surname for Phyrom ("Doung"). Brand bible says surname is UNKNOWN. This is a Critical, single-line, copy-paste fix.
2. **Pricing-comparison framing drift** — multiple files reach for "cheaper" / "half-price" / "lower fee" framing without consistent phrasing. The bible's frame is "5% take rate vs ~30% effective lead-gen cost" (outcome-tied vs pay-to-bid), not "cheap vs expensive." Brand bible should be amended to make this explicit.
3. **Founder pronoun inconsistency** — Phyrom alternates between first-person ("I built…") and third-person ("the founder commits…"). First-person is the brand voice; third-person flattens it.

Update 2026-04-24 — NEW systemic brand rule:

1. **Region-anchored brand language must be removed.** Sherpa Pros is **a national licensed-trade marketplace** with international roadmap. The launch geography (NH/ME/MA + Boston specialty) is a Phase 1/2/3 operational sequence, NOT the brand identity. Common violations to fix in every customer-facing artifact:
   - ❌ "the New England licensed-trade marketplace" → ✅ "the national licensed-trade marketplace, launching in New England Phase 1"
   - ❌ "Sherpa Pros for NH/ME/MA" → ✅ "Sherpa Pros (launching in NH, ME, MA — expanding nationally)"
   - ❌ "NH/ME homeowners" / "Boston homeowners" as audience labels → ✅ "Residential homeowners" / "Specialty / older-home owners" (use-case based, not region-based)
   - ❌ "Northern Triangle" as brand language → ✅ "Phase 1 launch metros" or name them explicitly
   - ✅ KEEP: founder story ("working New Hampshire general contractor" — Phyrom's real biography, not brand cap), state-specific operational notes (NHHBA, FW Webb, MassCEC, MA licensing), per-metro pricing bands (real cost-of-labor differences)

   See spec §3.4 (Geographic brand rules) for the canonical guidance.

Estimated apply-time for all P0 + P1 fixes: 40–60 minutes of Phyrom's time. P2 polish adds another ~30 min if desired.

2. P0 Issues — Block Launch (External, Public-Facing)

#	FILE	LINE(S)	VIOLATION	EXACT REPLACEMENT TEXT	SEVERITY
P0-1	`docs/marketing/email-sequences/pm-outbound.md`	22	**Surname violation.** Uses "Phyrom Doung" — surname is UNKNOWN per brand bible (was stripped from for-pros page in commit fc2a87c).	`Phyrom, founder of Sherpa Pros. I am also a working New Hampshire general contractor, so I have spent ten years on the other side of property manager work orders.` (drop the surname; rest of sentence is fine)	Critical

P0-2	`src/app/(marketing)/page.tsx`	240–244	**Founder card** uses initials "PD" (line 240) — encodes a surname that doesn't exist. Bible says display name is just "Phyrom."	Replace `PD` with `P` on line 240. (For-pros page already does this correctly at line 288.) Keep lines 243–244 as written — they correctly show "Phyrom" + "Founder · NH General Contractor" without surname.	**Critical**
P0-3	`src/app/(marketing)/page.tsx`	244	**Founder line missing HJD attribution.** For-pros page correctly says `Founder · NH General Contractor · HJD Builders LLC` (line 292). Homeowner landing page weaker line says only `Founder · NH General Contractor`. Inconsistent founder display across two flagship landing pages.	`Founder · NH General Contractor · HJD Builders LLC`	High
P0-4	`docs/marketing/email-sequences/pro-recruiting.md`	7, 39	**Email mismatch.** Header says `phyrom@thesherpapros.com`. CLAUDE.md and the rest of the artifacts use `poum@hjd.builders` for Phyrom. Two senders, one founder, undermines the personal-feel pitch. Confirm with Phyrom which alias is canonical and use it everywhere.	**If `phyrom@thesherpapros.com` is the production alias** → leave as-is and update Wefunder page-content.md line 189 + linkedin-editorial.md context box accordingly. **If `poum@hjd.builders` is canonical** → change to `poum@hjd.builders` here. (Phyrom's call — pick one.)	High
P0-5	`docs/fundraising/wefunder/page-content.md`	65	**Stat contradiction.** "Thumbtack has documented deposit-theft cases" — page-content.md elsewhere (line 81) says losses "$300–$6,500"; the deck (slide 2) and one-pager say "$300–$1,600"; for-pros page mentions no specific number. Pick one range and use it everywhere. The bible (§2.2) says "$300–$1,600."	Standardize on `$300–$1,600` per bible §2.2 across all artifacts. Specifically in page-content.md line 81, change "$300–$6,500" → `$300–$1,600`.	High
P0-6	`src/app/(marketing)/for-pros/page.tsx`	78	**"Old House Verified" missing hyphen.** Bible standardizes "Old-House Verified" (hyphenated) — used consistently in deck, one-pager, page-content, PR plan. For-pros page drops the hyphen.	`Your photo runs in the Mass Save and Old-House Verified press push.`	Medium

P0-7	`docs/fundraising/wefunder/page-content.md`	105	**Stat drift.** Says Mass Save heat-pump rebate is "$8,500 max in 2026." LinkedIn editorial post W3 Friday (line 95) says "$10,000+." Brand bible §2.3 says "$10K+." For-pros page line 80 says "$10K+." Pick one.	Standardize on `$10,000+` (per bible §2.3 + 4 other artifacts). Change "$8,500 max in 2026" → `$10,000+ in 2026`. (Verify the actual current Mass Save rebate cap before publishing — Phyrom should confirm; this is a sources question, not just a brand question.)	High
P0-8	`docs/marketing/linkedin-editorial.md`	51	**Self-imposed brand rule that is not in the bible.** Says: *"Never use the word 'homeowner' without 'neighbor' energy."* Bible §3.3 says "always say Local / Neighbor" but doesn't ban "homeowner." Multiple artifacts (page.tsx hero, faq, for-pros) use "homeowner" liberally and correctly. Either propagate this rule into the bible or strike it here.	Strike line 51 — this rule contradicts ~30 instances of "homeowner" already shipped across approved artifacts. The bible's intent is "treat homeowners as neighbors," not "never write the word 'homeowner.'"	Medium
P0-9	`src/app/(marketing)/page.tsx`	144	**Pricing-comparison framing.** "Three things you will not find on Angi" is a competitor-name-in-headline. Bible voice is plainspoken, dry; this is fine. **But** the value props underneath frame Sherpa Pros as the absence-of-Angi rather than the affirmative thing it is. Recommend adding the affirmative line right after.	Add a single sentence after line 148 paragraph: `<p>Built by a working contractor, for the contractors he works with every day.</p>` — restates the bible's positioning line. (Optional polish; consistency-improving.)	Low
P0-10	`docs/fundraising/wefunder/pr-launch-plan.md`	38	**Spell-out compliance miss in press release body.** First mention of "AG" appears at line 365 ("MA AG / NH DOL") — needs spell-out. **However, in the press release itself (line 40) "Vermont Attorney General" is correctly spelled out.** Cross-check that internal docs don't leak abbreviations to external reporters.	In line 365 (Open Items appendix), change `MA AG / NH DOL` → `Massachusetts Attorney General / New Hampshire Department of Labor`. (Lower priority because this is internal Phyrom-facing operating notes, not press-facing copy. Flag for hygiene.)	Low

3. P1 Issues — Fix Before Send-to-Investors

#	FILE	LINE(S)	VIOLATION	EXACT REPLACEMENT TEXT	SEVERITY

P1-1	`docs/pitch/sherpa-pros-deck-v1.md`	197	**Founder voice slip — third person.** Slide 9 reads `Founder of Sherpa Pros and the broader BldSync platform that powers the code-aware layer.` Internal name "BldSync" exposed externally. Bible says BldSync is internal.	Rewrite: `Founder of Sherpa Pros and the underlying code-intelligence layer that powers code-aware quote validation across the platform.` (Drops "BldSync"; restates in bible-aligned plainspoken terms.)	Critical
P1-2	`docs/pitch/sherpa-pros-deck-v1.md`	254	**Internal name "Wiseman" in appendix.** Appendix A1: `A1. Wiseman code-intelligence architecture (technical deep-dive — "code-aware layer" externally)` — **even with the parenthetical, the word "Wiseman" is on the slide and a screenshot of the appendix could leak.** Bible: never say externally.	Replace: `A1. Code-intelligence architecture (technical deep-dive of the code-aware quote validation layer) — for technical due diligence rooms`	High
P1-3	`docs/pitch/sherpa-pros-deck-v1.md`	87	**Internal name "Wiseman" in presenter notes.** `The internal name for the code engine is "Wiseman" — never say that word externally.` Presenter notes get pasted into speaker decks, exported to PDFs, screenshotted in coaching reviews. Even in presenter notes this leaks.	Move this rule out of the deck entirely — it belongs in the Brand Guardian Pre-Send Checklist (already at line 267) which already covers it. Delete sentence at line 87 entirely; keep the rest of the presenter note.	High
P1-4	`docs/fundraising/accelerators/suffolk-technologies-app.md`	137	**Internal name "Wiseman" in reviewer-bias notes.** `Mention Wiseman/code-aware engine only after the operator narrative is established.` Same risk as P1-3 — these notes get screenshotted into slack threads, AI agent inputs, and coaching reviews.	`Mention the code-aware quote validation engine only after the operator narrative is established.`	High
P1-5	`docs/fundraising/vc/building-ventures-warm-intro.md`	42	**Internal name "Wiseman" in research brief.** `Code-compliance / permit-validation engines (the Wiseman lane — externally "code-aware quote validation")` — same screenshot-leak risk.	`Code-compliance / permit-validation engines (Sherpa Pros' code-aware quote validation lane)`	High

P1-6	`docs/fundraising/wefunder/page-content.md`	393	**Self-reference to Brand Guardian as a process step in a public-facing page appendix.** Line 393 says: `Have the Brand Guardian agent review the page for forbidden phrases…` This is an INTERNAL operating note. If the page is exported as a PDF and shared with an investor, "Brand Guardian agent" reads as an unfunded internal process. Move to a separate ops-only file.	Strike line 393 from page-content.md (or move to a sibling `_internal-checklist.md` not linked from the public page). The page itself should end at line 380 (the disclaimer block) for public consumption.	Medium
P1-7	`docs/pitch/sherpa-pros-deck-v1.md`	218	**Slide 10 title contains a jargon abbreviation on first use.** `Title: Phase 0 exit gate. We trigger Phase 1 the moment any one of three doors opens.` "Phase 0" / "Phase 1" used without spell-out across the deck. Investors who haven't read the GTM spec don't know what "Phase 0" means.	Either spell out at slide-level: `Phase 0 — Fundraise & Prove. We trigger Phase 1 — Lean Launch — the moment any one of three doors opens.` OR add a small footer chip: `Phase 0 = first 90 days, fundraising + 10-pro beta. Phase 1 = Months 3–6, lean launch.`	Medium
P1-8	`docs/pitch/sherpa-pros-onepager-v1.md`	54	**LinkedIn placeholder unresolved.** `linkedin.com/in/phyrom (placeholder — confirm before send)` — flagged as placeholder but ships in the live one-pager.	If Phyrom has a public LinkedIn URL, paste it. If not, **strike the LinkedIn line entirely** rather than ship a placeholder to investors. (`mailto:` is enough at this stage.)	High
P1-9	`docs/pitch/sherpa-pros-onepager-v1.md`	28	**CAC/MRR/ARR/etc. — none used.** ✓ Verified one-pager is bible-clean on jargon. **But** Slide 7 of deck (line 151) uses `$2.0M ARR` without spelling out. Spell out on first use.	`$2.0M Annual Recurring Revenue (ARR) before the PM tier turns on.` (Then "ARR" alone is fine subsequently.)	Medium

P1-10	`docs/fundraising/accelerators/yc-app.md`	53	**284-municipal-codes claim** appears here but not in deck or one-pager. Either this stat is real and should be everywhere (it's a strong moat signal) or it's aspirational and shouldn't be in the YC app. Bible doesn't reference it.	If real (per CodeWiseman MEMORY entry: "284 municipal" codes confirmed in CodeWiseman scope) — propagate to deck Slide 4 and one-pager Pillar 2 as: `validates against NEC, IRC, MA Electrical, NH state code (RSA), and 284 NH municipal codes.` If not yet shipping in production — strike from yc-app.md line 53 + faq.md if anywhere.	Medium
P1-11	`docs/fundraising/accelerators/yc-app.md`	53	**One-pager / deck / YC app inconsistency.** YC app mentions PM tier as "$1.50/unit/month for the PM tier" — deck slide 7 shows "$4 → $1.50 per unit per month" with the higher anchor. Suffolk app line 47 shows "$1.50/unit/month" alone. Inconsistent: half the artifacts anchor at $4, half don't.	Standardize: always anchor at the higher number when introducing PM pricing — `$4/unit/month entry pricing, dropping to $1.50/unit/month at scale (5,000+ units)`. Then "$1.50" alone is fine in subsequent mentions.	Medium
P1-12	`docs/fundraising/wefunder/faq.md`	143	**LinkedIn search instruction.** `Search "Phyrom Sherpa Pros" on LinkedIn.` If Phyrom's LinkedIn URL is set (P1-8), put the URL here directly. Search instructions are friction that loses readers.	`Phyrom's public LinkedIn: [link]` (use real URL once confirmed). If LinkedIn is not yet set up, strike this entire item and lean on the email + portal channels.	Low

P1-13	`docs/pitch/sherpa-pros-deck-v1.md`	14	**Founder hook is strong but verbose for slide 1.** Bible says slide 1 line 1 = founder story. Current line 1: `Hi, I'm Phyrom. I run HJD Builders, a licensed general contractor in New Hampshire.` — good. But the next sentence is 60 words and breaks the 8th-grade reading flow on a single slide.	Break into two short lines for slide projection: `Hi, I'm Phyrom. I run HJD Builders — a licensed general contractor in New Hampshire.` [break] `I built Sherpa Pros because the platforms my crew gets pitched every week — Angi, Thumbtack, TaskRabbit, Handy — sell us leads we can't afford and send homeowners to people who shouldn't be touching their wiring.` (Drops "or their gas line" to fit slide; gas-line phrase belongs in the Wefunder long-form, not the deck.)	Low
P1-14	`docs/pitch/sherpa-pros-deck-v1.md`	99	**Slide 5 product demo references "Wiseman-checked" in negation.** `the on-screen badge says "Code-checked" — never "Wiseman-checked."` Same exposure risk as P1-2/3.	Rewrite presenter note: `The on-screen badge says "Code-checked." Verify before every screenshot capture that the production UI matches.` Drop the "never X" framing entirely.	High

4. P2 Issues — Polish

#	FILE	LINE(S)	VIOLATION	EXACT REPLACEMENT TEXT	SEVERITY

P2-1	`docs/marketing/email-sequences/pro-recruiting.md`	122	**Cohort composition list contradiction.** Email 4 (Day 9) says cohort is `2 GCs (NH), 1 electrician (Mass Save certified, MA), 1 plumber (NH), 1 HVAC (NH), 1 roofer (MA, old houses), 1 painter (ME), 1 handyman (NH)` = 8 pros. Wefunder page-content.md line 160 says cohort = `2 GCs (HJD network), 2 handymen, 1 plumber, 1 HVAC/heat-pump specialist` for NH (= 6 NH alone) plus ME (2) plus MA (3) = 11 pros. Two different "official" cohort compositions. Pick one and use it everywhere.	Standardize on the spec §5.1 composition (10–12 pros total): `2 GCs (HJD network), 2 handymen, 1 plumber, 1 HVAC / heat-pump specialist (NH); 1 painter, 1 landscaper (ME); 1 licensed electrician, 1 old-house specialist, 1 roofer (MA Boston specialty)` = 11 pros. Update pro-recruiting.md Email 4 to match.	Medium
P2-2	`docs/marketing/email-sequences/client-recruiting.md`	98	**Service claim that exceeds product spec.** `Twenty-four-seven dispatch. Licensed pros on call for water, fire, mold, and storm damage.` Brand bible §3.2 doesn't promise 24/7 emergency dispatch. The product spec (per CLAUDE.md schema) shows 7-factor dispatch but no 24/7 emergency-services SLA. Setting an emergency-response expectation that the platform may not meet is a churn / dispute risk.	Soften: `Fast dispatch when something breaks. Licensed pros for plumbing leaks, roof failures, electrical faults — usually matched within hours.` (Honest about typical match-time, drops the 24/7 promise.)	High
P2-3	`docs/marketing/email-sequences/client-recruiting.md`	91	**Domain mismatch.** `Bookmark this: [thesherpapros.com]({{home_url}})` — the brand bible and platform reference `www.thesherpapros.com`. CLAUDE.md confirms vercel as the live URL. `thesherpapros.com` is in the email alias (`phyrom@thesherpapros.com`) but unconfirmed as the public web URL.	If `thesherpapros.com` is the canonical public domain → confirm and update CLAUDE.md to reference it. If `www.thesherpapros.com` is canonical → change client-recruiting.md to `Bookmark this: [www.thesherpapros.com]({{home_url}})`. (Phyrom's call.)	High
P2-4	`docs/marketing/linkedin-editorial.md`	47	**Restriction on weekend posting "until Phyrom hits 5,000 followers."** This is operational-platform policy mixed into a brand-voice doc. Belongs in a separate `linkedin-ops.md` if anywhere. Bible doesn't restrict weekends.	Move to a sibling ops doc, or strike. Keeping the rule weakens the doc's brand-voice authority by introducing tactical noise.	Low

P2-5	`docs/marketing/linkedin-editorial.md`	87	**Post 1 hook contains "Angi receipt or text screenshot" as suggested asset** — flagging that Angi receipts may include trademarked terms or pro PII. Audit risk.	Add a checklist item before this asset is shipped: `[ ] Redact pro names, lead-IDs, and any pricing tied to identifiable accounts before screenshot publication.`	Low
P2-6	`docs/fundraising/vc/cvc-outreach.md`	22	**Phyrom-as-founder-letter signature in cold-CVC email line 22 reads "Phyrom" alone but earlier `pm-outbound.md` (P0-1) used "Phyrom Doung."** Inconsistent surname handling within the same author's outreach pack. (Already covered by P0-1 fix.)	Verify post-P0-1: every Phyrom signature across all outreach reads exactly `Phyrom` (no surname). Grep: `git grep -i "Phyrom [A-Z][a-z]"` after P0-1 lands.	Medium
P2-7	`docs/marketing/linkedin-editorial.md`	100	**Wk 4 Wed post hook: "lead-paint disclosure"** — minor: this should be hyphenated as "lead-paint" consistently (the post uses both). Brand voice consistency.	`Triple-deckers built pre-1978 = lead-paint disclosure required` (hyphenate "lead-paint").	Low
P2-8	`docs/fundraising/wefunder/pr-launch-plan.md`	235	**Launch-day LinkedIn post script** opens with a self-reflective "I'm Phyrom, I run HJD Builders, I built Sherpa Pros." All three clauses good — but bible voice rule: founder story is the LEAD HOOK. The current opening reads as introduction, not as story.	Sharper hook: `Today is the day. Twelve years ago I started HJD Builders to build houses. Today the platform I built for the contractors I hired — Sherpa Pros — is open to community ownership. [link]` (Ties HJD origin to today's action; founder story leads.)	Low
P2-9	`docs/fundraising/accelerators/yc-app.md`	80	**"Houzz Pro is 1.03★ on the BBB across 500+ complaints"** — strong stat, but only appears in YC app and Suffolk app, not in deck or one-pager. If true, propagate. If unverifiable, strike.	Verify the stat (Houzz Pro BBB rating + complaint count current to Q1 2026) and propagate to deck Slide 2 + one-pager Pillar 1 as a fifth bullet. Or strike.	Medium
P2-10	`src/app/(marketing)/page.tsx`	363	**Email body parameter passes a question mark in a mailto subject** — minor escape edge case but works. Email subject "Request Service in My Area" is a fine homeowner-side trigger. ✓ No fix needed.	(Pass — no action.)	—

5. Bright-Line "Never Say" Violation Tally

cross all 15 audited files:

A

BANNED TERM	COUNT	FILES (RANKED BY EXPOSURE RISK)
"Wiseman" externally	5 critical instances + 1 explicit don't-say sentence	`sherpa-pros-deck-v1.md` ×3 (lines 87, 99, 254) — all P1; `suffolk-technologies-app.md` ×1 (line 137) — P1; `building-ventures-warm-intro.md` ×1 (line 42) — P1; `linkedin-editorial.md` line 45 (rule statement, OK)
"Gig" / "Task"	0 violations ✓	None found in any artifact. Bible respected. (Some operational notes use "task force" or similar non-banned compound nouns.)
"Uber for X" externally	0 violations ✓	None found. CLAUDE.md uses "Uber for contractors" internally only — correctly excluded from external artifacts. (Note: `landing-page.tsx` does NOT use this phrase.)
"AI-powered" as headline	0 violations ✓	"AI" mentioned in 3 places (deck slide 3 line 59, yc-app.md, suffolk-app.md) — all as supporting points or in capability descriptions, never as headline. Bible respected.
"Disrupt"	0 violations ✓	Not used anywhere.
"Revolutionize"	0 violations ✓	Not used anywhere.
Jargon abbreviations on first use	6 instances	Detail below

Jargon-spell-out misses (first-use violations):

FILE	LINE	ABBREVIATION	REQUIRED SPELL-OUT
`sherpa-pros-deck-v1.md`	151	ARR	Annual Recurring Revenue (ARR)
`sherpa-pros-deck-v1.md`	218	Phase 0/1	Phase 0 (first 90 days) / Phase 1 (Months 3–6) — see P1-7
`pr-launch-plan.md`	365	MA AG / NH DOL	Massachusetts Attorney General / New Hampshire Department of Labor
`cvc-outreach.md`	12	PUC	Public Utilities Commission ✓ (already spelled out — good catch on first use)
`cvc-outreach.md`	268	DPU	Department of Public Utilities (spell out on first use in this section)
`pm-outbound.md`	8	Operating notes mention NOI / CapEx but spell out on first use ✓	(No fix needed — bible respected.)

Surname (Doung) violations: 1 instance — `pm-outbound.md` line 22. See P0-1.

6. Founder-Story Handling Assessment

Bible rule (§3.3): *"Founder story is the lead hook. A working NH GC built the platform he wished existed. This goes on slide 1 of every deck, line 1 of every pro recruit, paragraph 1 of every PR placement."*

FILE	FOUNDER STORY LEADS?	NOTES
`src/app/(marketing)/page.tsx` (homeowner landing)	Partial	Hero is a separate component (`<Hero />`). Founder card appears at section 4 (lines 236–251), not at hero. Acceptable for SEO/conversion structure, but verify `<Hero />` component itself opens with a founder reference. **Action:** spot-check `components/marketing/Hero.tsx`.
`src/app/(marketing)/for-pros/page.tsx`	Yes	Hero subhead line 123: `Built by a working New Hampshire general contractor.` Strong placement. ✓
`docs/fundraising/wefunder/page-content.md`	Yes	Section 1 hero subhead + Section 2 paragraph 1: `I'm Phyrom. I'm a working general contractor in New Hampshire.` ✓
`docs/fundraising/wefunder/pr-launch-plan.md`	Yes	Press-release dateline + lede put Phyrom and HJD Builders in the first sentence. ✓
`docs/marketing/linkedin-editorial.md`	Yes	Persona doc opens with Phyrom + HJD framing. Each post template puts founder voice first. ✓
`docs/pitch/sherpa-pros-deck-v1.md`	Yes	Slide 1 line 1: `Hi, I'm Phyrom. I run HJD Builders…` ✓ Strongest of the bunch.
`docs/pitch/sherpa-pros-onepager-v1.md`	Partial	"The Answer" opens with positioning, not founder. Founder appears in subline + author block. **Action:** Add a single sentence at the start of "The Answer" — `Built by Phyrom, a working New Hampshire general contractor (HJD Builders LLC).`
`docs/fundraising/wefunder/faq.md`	No (acceptable)	FAQ is a Q&A, not a narrative — founder voice appears at Q9, Q21, Q22. Acceptable for the format. ✓
`docs/fundraising/accelerators/yc-app.md`	Yes	Q5/Q14 lead with "I'm a working general contractor in New Hampshire." ✓
`docs/fundraising/accelerators/suffolk-technologies-app.md`	Yes	Q-bio + closing "anything else" both lead with the GC angle. ✓
`docs/marketing/email-sequences/pro-recruiting.md`	Yes	Email 1 line 1: `Phyrom here. I run HJD Builders out of New Hampshire. I am a working general contractor, same as you.` ✓ Best founder-voice line in the entire pack.
`docs/marketing/email-sequences/client-recruiting.md`	Yes	Email 1 opens with `You know me from HJD Builders.` ✓
`docs/marketing/email-sequences/pm-outbound.md`	Partial	Opens with `Phyrom Doung, founder of Sherpa Pros. I am also a working New Hampshire general contractor.` Founder voice is there but **the surname violation (P0-1)** is the bigger issue.
`docs/fundraising/vc/building-ventures-warm-intro.md`	Yes	Both intro-request templates and the cold-email backup put HJD Builders + working GC in line 1. ✓
`docs/fundraising/vc/cvc-outreach.md`	Yes	NGP cold email line 1: `I'm Phyrom, founder of Sherpa Pros. I'm a working general contractor in New Hampshire.` ✓

Pass rate: 12 of 15 strong + 3 partial → **excellent founder-story discipline overall.**

7. Voice Consistency Rubric (Score 1–5)

Rubric: 5 = bible-perfect, 4 = strong with minor slips, 3 = mixed, 2 = significant drift, 1 = off-brand.

FILE	PLAINSPOKEN	JARGON-DISCIPLINE	FOUNDER-VOICE AUTHENTICITY	CTA CLARITY	TOTAL /20
`page.tsx` (homeowner)	5	5	4	5	**19**
`for-pros/page.tsx`	5	5	5	5	**20**
`wefunder/page-content.md`	5	4	5	4	**18**
`wefunder/pr-launch-plan.md`	4	4	5	4	**17**
`linkedin-editorial.md`	5	4	5	5	**19**
`pitch/sherpa-pros-deck-v1.md`	4	3	5	4	**16** (Wiseman leaks drag this down)
`pitch/sherpa-pros-onepager-v1.md`	5	5	4	4	**18**
`wefunder/faq.md`	5	5	4	4	**18**
`accelerators/yc-app.md`	5	4	5	5	**19**
`accelerators/suffolk-technologies-app.md`	4	3	5	5	**17** (Wiseman leak in reviewer notes)
`email-sequences/pro-recruiting.md`	5	5	5	5	**20**
`email-sequences/client-recruiting.md`	5	5	5	5	**20** (Best in the pack — exemplar)
`email-sequences/pm-outbound.md`	4	5	4	5	**18** (surname drag)
`vc/building-ventures-warm-intro.md`	5	3	5	5	**18** (Wiseman in research brief)
`vc/cvc-outreach.md`	4	4	5	5	**18**

Average: 18.3/20 = **91.5%** = **A-** at the per-file level.

Aggregate brand-health letter (factoring in Critical surname violation + cross-file consistency drift): B+.

8. Recommended Fix Order — Pareto Pass (Top 5 = 80% of Improvement)

pply in this order to maximize brand-health gain per minute of Phyrom's time:

1. **P0-1** — Strip "Doung" from `pm-outbound.md` line 22. **2 minutes.** Single Critical violation.
2. **P1-1, P1-2, P1-3, P1-4, P1-5, P1-14** — Strip every "Wiseman" reference from external/external-adjacent artifacts (5 file edits, 6 lines total). **15 minutes.** Eliminates the bible's #1 bright-line risk across the entire pack.
3. **P0-5, P0-7, P1-11** — Standardize every cross-artifact stat (Thumbtack range, Mass Save rebate, PM tier pricing). **20 minutes.** A single inconsistent stat in front of an investor reads as "founder doesn't know his own numbers." This is the single biggest credibility lift.
4. **P2-2, P2-3** — Soften the 24/7 emergency promise + resolve the domain question (`thesherpapros.com` vs `vercel.app`). **10 minutes.** The 24/7 promise is a churn risk; the domain question is a trust signal.
5. **P0-2 + P0-3** — Fix the homeowner landing-page founder card (initials "PD" → "P"; add "HJD Builders LLC"). **3 minutes.** Brings the homeowner landing page to parity with the for-pros page (which already does this correctly).

Total apply time for top-5 fixes: ~50 minutes. **Brand-health letter post-fix: A-.**

The remaining ~12 P1/P2 items add the final ~10% of polish in another ~30–40 minutes.

9. Off-Bible Findings (Outside the Brand Audit Scope, But Worth Flagging)

Factual / link / dated-stat issues

1. **Wefunder URL is a guess.** `wefunder.com/sherpapros` appears in 4 files (page-content, pr-launch-plan, linkedin-editorial pre-launch posts) without confirmation. Phyrom needs to register/confirm with Wefunder rep before any of these go live.
2. **"Mass Save 2026 heat pump rebate $8,500 vs $10K+"** — see P0-7. This is also a factual discrepancy with external Mass Save program documentation. Confirm the actual current cap from masssave.com before publishing.
3. **`docs/pitch/sherpa-pros-onepager-v1.md` line 54** has an unresolved LinkedIn placeholder — flagged in P1-8.
4. **`docs/pitch/sherpa-pros-deck-v1.md` slide 8** has unresolved `[X / Y / Z]` traction placeholders (lines 168–173) — bible-acknowledged ("drop in real numbers from the live Stripe Connect dashboard") but worth flagging that **this deck is not investor-ready until those numbers are filled**.
5. **`docs/fundraising/wefunder/page-content.md` Section 6** has 11 placeholder fields (`[X]`, `[Y]`, `[Z]`, `[N]%`, `[score]`, `[count]`, `[STATUS PLACEHOLDER]` ×3). Same constraint — page is not Wefunder-ready until populated.

Cross-artifact contradictions

1. **CLAUDE.md says** Sherpa Pros = "Construction marketplace (**Uber for contractors**) connecting clients with verified pros." Bible §3.3 says **never** say "Uber for X" externally. CLAUDE.md is internal but — if it's being read by AI agents that generate external copy — the framing leaks. **Recommendation:** edit CLAUDE.md to reframe as "construction marketplace connecting clients with verified, licensed pros for on-demand trade work" (drop the "Uber for X" shorthand even internally, since it shapes downstream AI output).
2. **Two senders / two emails for Phyrom** — see P0-4. `phyrom@thesherpapros.com` (pro-recruiting, pm-outbound) vs `poum@hjd.builders` (Wefunder page, deck, one-pager). Pick one canonical investor-facing alias and propagate.
3. **HJD founding year** — Wefunder page-content.md line 63 says "12 years ago"; deck slide 1 line 16 says "12+ years"; faq.md Q9 line 93 says "two years" (referring to *platform* self-funding, not HJD itself — but a reader could conflate). **Recommendation:** standardize on `12+ years as a working NH general contractor` for HJD, and `2 years self-funding the Sherpa Pros platform build` for the platform timeline. Don't say "[YEAR]" placeholder in page-content.md line 187 — replace with actual year.
4. **`docs/fundraising/wefunder/page-content.md` line 187** has literal placeholder `[YEAR]` for HJD founding year. Flag for Phyrom: state it.

Brand-bible amendment recommendations

1. **The brand bible should explicitly address pricing-comparison language.** Across the 15 files I see:
   - "half of what Angi effectively charges" (deck, one-pager, for-pros)
   - "roughly half a contractor's all-in Angi cost" (one-pager, faq, suffolk-app, yc-app)
   - "half-price forever" (for-pros founding-pro section)
   - "lower fee" / "cheaper" don't appear, but **"better deal forever"** (for-pros line 249) and **"5 cents on the dollar"** (for-pros founder quote) do. The variance is OK voice-wise but a single canonical phrasing would tighten the pack.
     Recommendation: add to bible §3.3 — *"Pricing comparison standard phrase: 'roughly half the all-in cost a contractor pays Angi today.' Avoid 'cheaper,' 'lower,' 'better deal' — they invite price comparison, not value comparison."*
2. **The brand bible should clarify the surname rule.** Right now the rule lives only in commit fc2a87c context + the auditor's job to remember. Codify in §3.3: *"Founder display name is 'Phyrom' — surname is unknown / not confirmed and must not be guessed in any external artifact. Display pattern:* `Phyrom · Founder · NH General Contractor · HJD Builders LLC`*. Initials display:* `P` *(single letter). Never* `PD` *or any letter pair encoding a guessed surname."*
3. **The brand bible should standardize the canonical product URL.** Right now the bible doesn't pick between `www.thesherpapros.com`, `thesherpapros.com`, and the email-domain `@thesherpapros.com`. Pick one for each (web, email) and lock it.

Audit complete.
